Printed by the Nottingham University Press.

Front Cover: Cliff Quarry, Crich, Derbyshire, showing a sequence of Lower Carboniferous limestones folded into an anticline. The position of a wayboard clay seam is indicated on the photograph by vertical dark streaks on the rocks which commence at the clay seam. (See article by Dorning and Wood p.145). The fore-ground is occupied by equipment of the Crich Tramway Museum and on the sky-line is the Memorial Tower to the Sherwood Foresters.
