

British Triassic palaeontology: new literature supplement 34

A review of British Triassic palaeontology was published by the writer in 1976 (*Proc. Ussher Soc.*, **3**, 341-353). Supplements to the bibliography appeared annually in that journal until 1986, and from 1987 to 2009 in *Albertiana*, the newsletter of the Sub-commission on Triassic Stratigraphy. To make information on new literature on this subject more accessible to British workers, the series continues in the *Mercian Geologist*, beginning with this supplement, number 34, compiled in the year to 29 February 2012.
